Lahey Hospital, UMass medical link up

Academic affiliation comes with plans for regional medical site

By Jessica Bartlett
GLOBE STAFF

Lahey Hospital and Medical Center will change its academic affiliation from Tufts University School of Medicine to UMass Chan Medical School, with plans to establish a new regional medical campus in Burlington.

The hospital, which is part of Beth Israel Lahey Health, and the medical school announced on Thursday that they had signed a letter of intent to ex-

plore the collaboration.

The duo would need to sign a formal agreement and receive accreditation from the Liaison Committee on Medical Education, but executives hope to welcome the first class of students to the program in the summer of 2024.

Beth Israel Deaconess Medical Center will retain its academic affiliation with Harvard Medical School, and the academic affiliations of the system's other hospitals will not change.

The hospital's move away from Tufts comes a few months after Tufts University School of Medicine tightened its relationship with Tufts Medicine, the health system formerly

known as Wellforce.

However, Lahey executives said they had undertaken a request for proposals recently to redefine its academic approach, in light of the pandemic and its 100th anniversary next year.

"This process was spawned by us reflecting on who we are and what our vision is moving forward," said Dr. David Longworth, president of Lahey Hospital and Medical Center.

Of the half-dozen organizations that submitted proposals, UMass offered the most compelling plan, according to Lahey.

In the new program, 40 medical students per year would undertake

JOANNE RATHE

Lahey Hospital and Medical Center in Burlington will be the site of a new regional medical campus associated with UMass Chan Medical School.
